How Students Take Part in the Times Table World Cup.

1. Introduction

Hopefully, the answer to "How Students Take Part in the Times Table World Cup" is with a smile 😊.

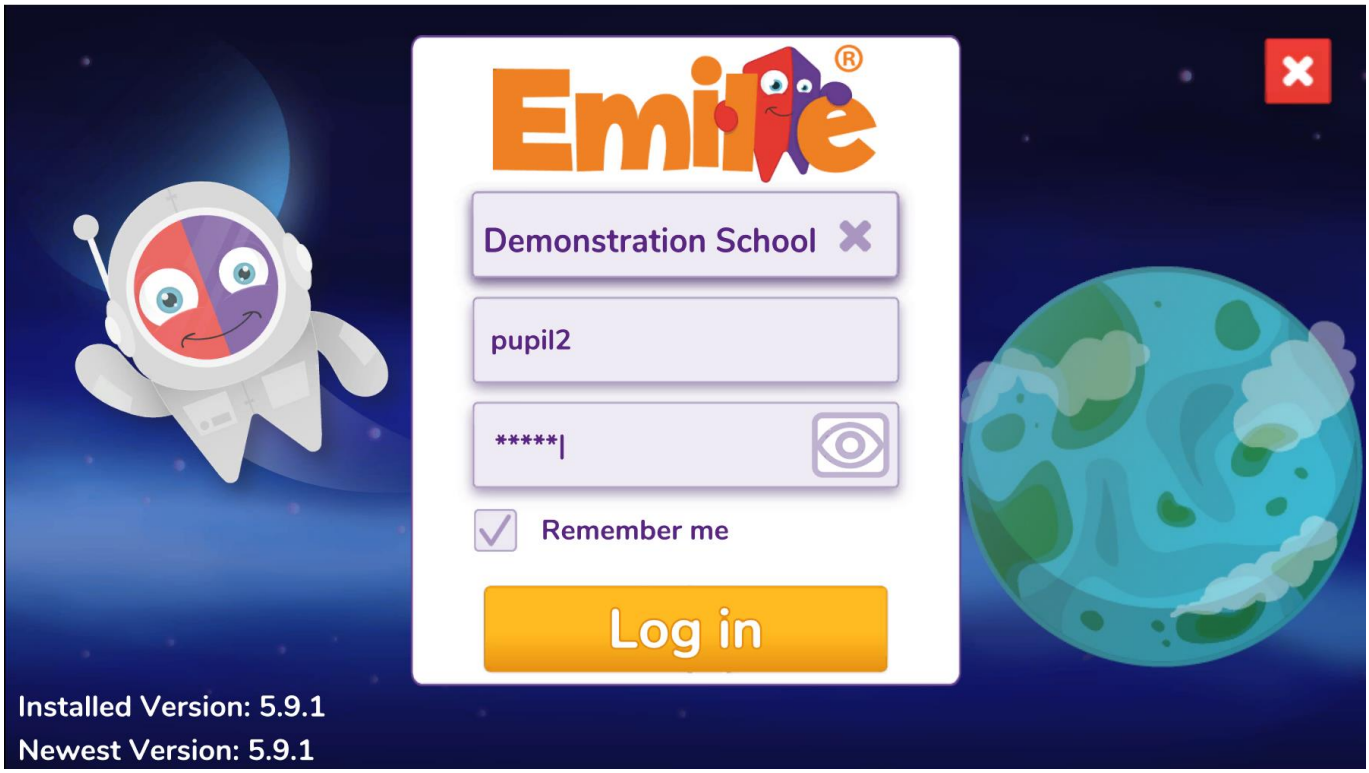

This Guide assumes you have usernames and passwords for your students already. If not, please visit here.

2. Logging on to Emile:

Students can log on to Emile using either:

- an App - Windows, Chromebook, Android, iPhone/iPad compatible – Click to download.
- a webpage - click here

They should choose their school either by name or by post code (especially helpful for schools such as St James or St Marys) from the dropdown box, then enter their username and password!

Please make sure you are using version 5.9.1 or higher.

(You can see the version number in the bottom left corner of the log in screen)

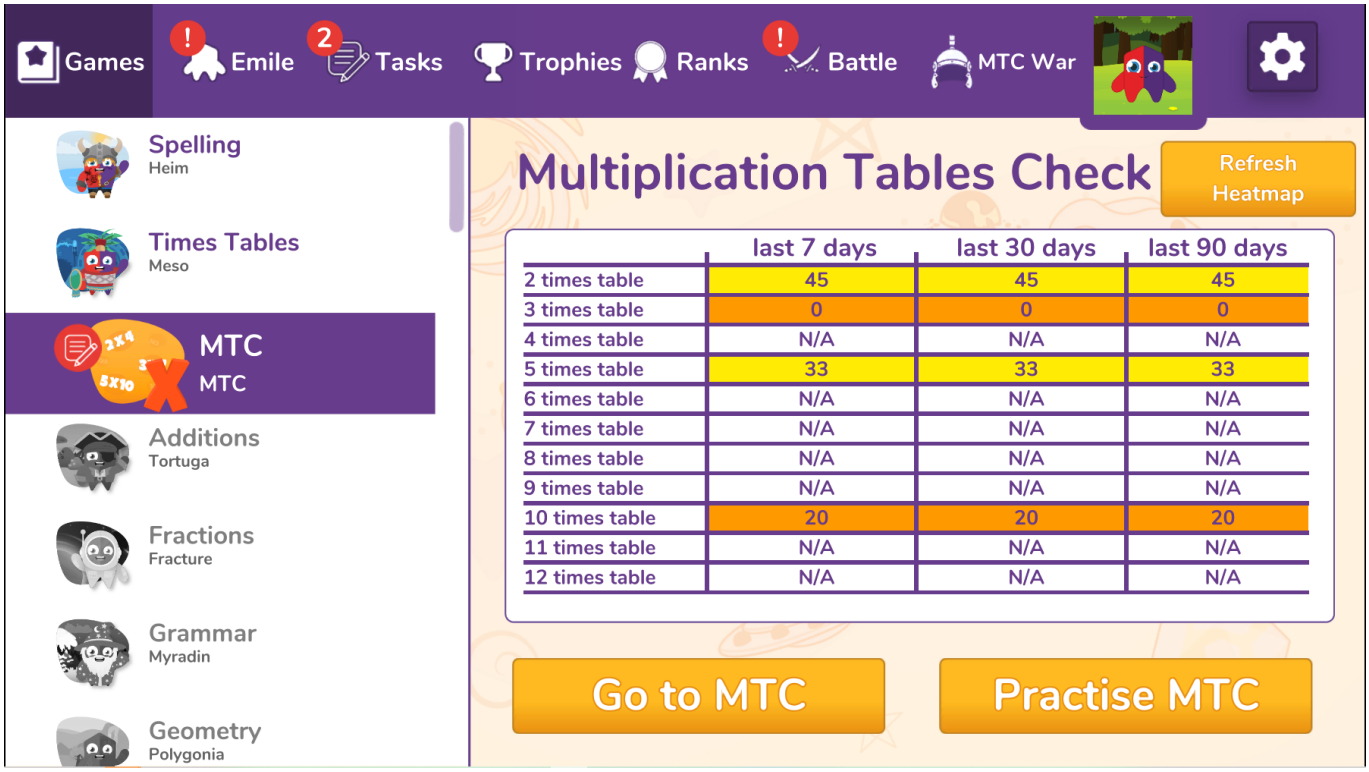

3. The Times Table World Cup

So that using Emile impacts Year 4 MTC scores, there are only certain game types that allow students to score points for the world cup. Namely those MTC style games that cover all the times tables 2-12 with 6 seconds to answer.

Your students have access to a number of different games (including spelling games) but these of course do not contribute points.

Using "Go to MTC" is the easiest way for students to contribute.

Alternately, they can click on MTC War and see how they are doing, how the school is doing and the top 5 performers. On that screen, there is a "Play" button.

4. **How Scores are Determined.**

When playing an appropriate MTC style game, every correct answer means a point for that student. Wrong answers have no impact. We are rewarding effort to encourage students to do the game again and again.

Students are ranked in order of points. Each student is then given a score based on their rank. This is so that 3 or 4 students that score masses of point don't overwhelm the contribution of other students.

Finally, the average score of the students determines the school's position.
